

I am a satellite subscriber living in Tyler, Texas. Tyler is part of the Tyler/Longview/Lufkin/Nacogdoches Designated Market Area (DMA) located in Smith County, Texas.

Our local cable company is (was) allowed to offer some Dallas/Fort Worth local channels to our area that are not currently on the list. Currently, WFAA-TV (Dallas) 8 is offered to cable subscribers. In the past, KXAS-TV (Dallas) 5 and KTXA-TV (Fort Worth) 21 were offered to cable subscribers. These three channels are absent from the current list.

Finally, one of our own local channels currently offered by cable and satellite companies is missing from the list. KYTX-TV (Nacogdoches) 19 is not on the list.

In summary, please add these channels to SMITH COUNTY, Texas:

KXAS-TV (Dallas) 5

WFAA-TV (Dallas) 8

KYTX-TV (Nacogdoches) 19

KTXA-TV (Fort Worth) 21

It is unfair to satellite subscribers to prevent satellite providers from providing these channels that cable companies are allowed to offer. Since two Dallas local channels are already on the list for Smith County, Texas, the other major Dallas stations should also be placed on the list. Thank you.
